## SUMMARY

Graduate researcher and developer working at the intersection of educational technology, game design, and AI. Currently pursuing an M.S. at Tohoku Gakuin University while interning at Innuna Inc. as an iOS app developer for an educational simulation app. Former Game Planner and UI/UX Designer at a Shanghai game studio, with a track record of shipping products and driving measurable outcomes.

## EDUCATION

**Tohoku Gakuin University** — M.S. Human Information Science Apr 2025 – Mar 2027 (expected)  
*Supervisor: Prof. Tadashi Inagaki · Research: Geology Serious Game Development & Effectiveness Evaluation*

**Henan Normal University New Union College** — B.E. Civil Engineering Sep 2018 – Jun 2022

## WORK EXPERIENCE

**iOS App Developer & App Designer (Intern)** · Innuna Inc. Jan 2026 – present

- Developed the iOS frontend for "谷积养育模拟," an educational simulation app for parents of kindergarten and elementary school children
- Led end-to-end app design and Swift-based implementation of the user interface
- Published on the Apple App Store (China region)

**Game Planner & UI/UX Designer** · Zhúzi Network Technology, Shanghai Jan 2022 – Jan 2023  
*Joined as intern (Jan 2022) → promoted to full-time employee (Apr 2022)*

- Designed game systems, levels, and UI/UX for mobile titles; owned the full workflow from requirement analysis to visual delivery
- Led ad creative optimization initiative, achieving a 30% improvement in ad performance
- Participated in agile sprints; authored feature specs and design guidelines

## RESEARCH & PUBLICATIONS

**Geology Serious Game for Middle School Students** · Tohoku Gakuin University Apr 2025 – present

- Developed a Unity/C# game demo simulating geological fieldwork: borehole surveys, geological hammer use, and stratigraphic analysis
- Integrated generative AI to power terrain change simulation, enabling hypothesis-driven inquiry learning
- Conducted user studies with middle school students; collected questionnaire and qualitative feedback data

### Publications

- Zhang Shifeng, Inagaki T. "Development of a Geology Serious Game Combining Generative AI Terrain Simulation and Geological Survey." JSET Annual Conference, Sep 2025. (Poster)
- Zhang Shifeng, Inagaki T. "Examining Learner Responses and Conceptual Understanding through a Geology Serious Game Trial." JSET Annual Conference, Mar 2026. (Oral, scheduled)

KEY PROJECTS

| Project              | Stack                          | Description                                                                                                                  |
|----------------------|--------------------------------|------------------------------------------------------------------------------------------------------------------------------|
| Geology Serious Game | Unity / C#                     | Educational game for middle school geology. Simulates real fieldwork tools; integrates generative AI for terrain simulation. |
| ChatJLPT             | TypeScript / OpenAI API        | AI-powered JLPT study companion with conversational practice. Live at chatjlpt.jp                                            |
| ToeicMaster          | TypeScript / Python / Supabase | AI-powered TOEIC practice web app. Live at toeicmaster.net                                                                   |
| Cheess! OCR          | Swift / Apple Vision           | macOS OCR tool built with Apple Vision framework. Available on App Store.                                                    |
| AirAlarm             | Swift / SwiftUI                | Smart sleep alarm with AirPods sleep detection and 90-min cycle technology. Live on App Store.                               |

SKILLS & LANGUAGES

**Development:** Unity, C#, Swift/iOS, JavaScript, Next.js, Python, HTML/CSS

**Design & Tools:** UI/UX Design, Figma, Git/GitHub, Generative AI integration (OpenAI API)

**Languages:** Chinese (Native) · Japanese (JLPT N1, business-level, academic presentations) · English (TOEIC 680)
